Lahore,PK

OVERVIEW

Software development professional with 3+ years of experience in developing web applications using React, TypeScript and JavaScript. Skilled in creating and deploying complex frontend-end systems, RESTful web services and scalable databases .

TECHNICAL SKILLS

- **Technologies & Frameworks**

JavaScript, TypeScript, React.js.

- **Libraries**

- JQuery, Bootstrap, Tailwind

- **Deployment**

- AWS (Lambda, EC2, S3), Hostinger, GoDaddy, Docker, Render, Vercel

EXPERIENCE

Codesthinker

January 2025 - Present

Frontend Web Developer

- Developed frontend-developer web applications using React.js, Angular ,Typescript ensuring seamless user experience
- Engineered frontend architecture with TypeScript implementing robust type system and scalable state management to ensure code quality and long-term maintainability
- Led frontend development of an Anesthesiology Board Preparation platform and a Food Delivery Application, enhancing user engagement with real-time features and efficient state management
- Built dynamic, interactive UIs with modern frontend frameworks, optimizing performance accessibility
- Collaborated with backend teams integrate RESTful APIs and GraphQL services,improving data flow and frontend -backend interaction
- Ensured scalable maintainable frontend architecture with modular component design and TypeScript best practice

CodeLab

July 2022 - December 2024

Frontend Developer

- Developed dynamic, responsive web applications using Angular and React.js and Next.js , delivering seamless user experience
- Collaborated with UX/UI designers to implement pixel-perfect, mobile-first interfaces with responsive design principles

- Integrated WebSockets for real-time updates and notifications, enhancing user engagement and interactivity
- Built high-performance frontends for data-heavy applications, optimizing rendering efficiency and load times
- Connected frontend systems with RESTful APIs, ensuring smooth data flow and integration with backend services
- Leveraged React.js and Next.js to create server-side rendered and static web applications for improved SEO and performance

PROJECTS

Collaborative Design Platform

- Engineered a real time collaborative editor using Tiptap with WebSockets synchronization
- Resolved merge conflicts via CRDT algorithms, enabling seamless multi-user editing
- Designed a scalable component library using emotion and storybook
- Integrated figma plugin API for direct design asset imports.

Trend Car Care

- Developed Trend Car Care a customer-focused web application using React.js to manage car care services, appointments, and customer interactions.
- Implemented a fully responsive design for Trend Car Care ensuring seamless user experience across desktop and mobile devices.
- Integrated a booking system within Trend Car Care allowing customers to schedule services, view availability, and manage their appointments.
- Engineered the Trend Car Care application with a focus on maintainability, employing reusable components and a modular architecture.

The Givers Consulting

- Developed The Givers Consulting that showcases a consultancy company specializing in innovative solutions for consultancy, IT, and mining.
- Designed and implemented a platform to highlight a range of services, including consultancy, overseas employment, IT-enabled services, and mining and mineral resources management.
- Built a presence to emphasize the company's global connections and position it as a comprehensive platform for clients.
- Created this, detailing the company's history of serving over 2000 clients and its 5+ years of operation.

EDUCATION

The Islamia University of Bahawalpur
 Bachelors | **Software Engineering** | 2024-2028
